© What can the sun teach us about nuclear power?

("Nuclear" / "Power" -- NOT a redundancy, REALLY. Nuclear "field" (radiation) physics is not, by definition, equivalent (conductive) to the concept of "power" & requires addition of (extensive) external processes to become useful to notions of "power".)

Maybe it [radiation] amounts to a... [harmful] radiation IS... inverted, despite it being the result of... type(s) of (subatomic) particles... effects, which have [has]=(viable) effects on the biological (formal) energetic substances/beings even though it (radiation) has its... [More](#)
